

ZURN® Tomorrow's Plumbing and Heating Solutions Today®

We all know that reducing our negative impact on the environment is important to protect our future. But you don't have to wait to experience the environmental benefits and comfort that Zurn PEX® Plumbing and Radiant Heating Systems deliver today.

Increase the comfort of your home, while decreasing your impact on the earth. Choose Zurn PEX.

PEX Products Have Many Energy Saving and Green Benefits

Zurn PEX Plumbing and Radiant Heating in the overall and comprehensive plan to achieve a LEED credit. Our team can also help deliver innovative product solutions beyond the standard green or LEED criteria.

Zurn PEX Plumbing Systems

- Uses no chemicals to join fittings.
- Zurn PEX tubing has a higher R-value than both copper or CPVC and is more resistant to heat loss, so your hot water lines stay hotter longer.
- Smooth interior walls resist mineral buildup and corrosion.
- Zurn PEX is also resistant to aggressive chemicals like chlorine in drinking water.
- Sanitary, listed by NSF International as safe to use in drinking-water applications.
- Zurn PEX tubing is freeze-damage resistant. The tubing can expand, typically avoiding costly ruptures.
- Absorbs water hammer in flexible pipe walls.
- Manifold or home-run systems save water compared to traditional Main and Branch plumbing systems.

Zurn PEX Radiant Heating Systems

- Energy efficient which gives you typical savings of 20-40% when compared with other types of heating systems.
- No fans to blow dust and other allergens into the air, keeping your home cleaner and healthier.
- No noisy fan motors or rushing air, so you enjoy a quiet home.
- Less energy is required to achieve the desired level of comfort.
